Asia Pacific Mining Conference

Indonesia Mining Outlook:

Tapping Opportunities Within The Global Economic Perspective

The Asia Pacific Mining Conference (APMC) 2012, is a gathering of key stakeholders from the world's mining industry, held in Jakarta the capital of city in Indonesia, one of the most attractive countries in the Southeast Asia region for economic growth and investment. Featuring national and international leading investors, operators, practitioners and service providers in the industry. Invited are prominent speakers to share their views, experiences and topics relevant to the current challenges and global trends, influencing the future of the mining industry. For participants there will also be special networking events in a more relaxed environment, such as the opening dinner, a golf tournament and closing cocktail session.

Mining & Engineering Indonesia 2012

Held alongside the Asia Pacific Mining Conference, the inaugural Mining and Engineering (M&E) Indonesia is positioned as the new B2B exhibition that delivers significant business opportunities for local and international suppliers specialising in exploration, mining and minerals processing. M&E Indonesia is the platform for suppliers who are seeking increased share of Indonesia fast growing industry to enhance your business profile, launch your latest products, technologies and services and network with mining professionals from Indonesia and the surrounding region. Buyers, on the other hand, can source for alternative suppliers/products from international players and network with the mining community.
